Monday, February 2, 2026

## Previous Week Market Review

The Nigerian equity market closed last week's trading in negative territory amid sustained cautious trading, despite a predominantly positive bias across sessions. The overall market downturn was driven by profit-taking in selected mid-cap and blue-chip stocks across key sectors, alongside investors' positioning for fundamentally strong stocks as well as corporate earnings releases.

In addition, the All-Share index decreased by 141.78 basis points in the previous week, representing a decline of -0.09% to close at 165,370.40 absolute point. The Market Capitalization, on the other hand, gained ₦194.18 billion w/w, rose by 0.18%, to close at ₦106.15 trillion.
